

## Virtuoso Premium Polish and Cleaner Directions For Use

1. Shake bottle well.
2. Apply a dime size amount of polish or cleaner for each 6"x 6" area to be cleaned.
3. Rub firmly in a circular motion moving out from the center and then back towards the middle of area. Do not worry about the pressure. Since there are no abrasives in Virtuoso Premium Polish and Cleaner, and it is chemically programmed not to react with any type of varnish, shellac or lacquer, your finish will be safe.
4. Wipe excess polish or cleaner off and buff to a shine. Make sure you are using a clean cloth...since Virtuoso Premium Cleaner is designed to attack waxes and other build ups you may wind up with a slight haze if there is any other polish or cleaner residues on the cloth.

### ***A word of caution:***

Virtuoso Premium Polish and Cleaner are very effective. Your instrument will have a very high gloss shine, which is desirable to most collectors, but we have had a few people say that Virtuoso Premium Polish was too shiny for their personal taste. If you have any concerns about your instrument's finish being too shiny, please test a small inconspicuous area first to see how you like the results. Virtuoso Premium Cleaner will clean your instrument without enhancing the finish's natural luster if you prefer a low gloss appearance. If you have any questions, please email us at [virtuosopolish@sbcglobal.net](mailto:virtuosopolish@sbcglobal.net) or call us at 818-992-4733.

Virtuoso Premium Polish and Cleaner are different than any polish and cleaners you may have used before. They were designed specifically for vintage guitar finishes because they require more care and attention than modern polyurethane finishes.

**Our products are NOT RECOMMENDED for satin or matte finishes.** Most recommend using just a clean damp cloth to clean the satin finish. Virtuoso Premium Products will make a satin finish high gloss shiny which most people do not want hence our recommendation for not using them. If you desire to make your satin finish high gloss shiny, our products are safe for your finish but note that the process is irreversible. ***We do not recommend using our products on finishes that are checked as the products can seep into the cracks and near impossible to remove.*** We created a cleaner that will cut through years of build up...whether it is wax, sweat, spilled beer, etc....all without lifting or damaging the finish.

**Our products are NOT RECOMMENDED for Fretboards or any unfinished part of your instrument.**

If your guitar is already clean, apply some Virtuoso Premium Polish to a small area and then hold your guitar up to the light and see how much deeper the luster is in the area that was treated. Virtuoso Premium Polish also provides a very high level of UV protection! This will keep your finish from fading any further than it already has. If you own a newer guitar, it will keep it from fading at all. We recommend reapplication once a month if your guitar is on display under fluorescent lights or exposed to direct sunlight.

We hope you enjoy using Virtuoso Premium Polish and Cleaner for your special musical instruments!
