

CONGRATULATIONS ON THE PURCHASE OF YOUR NEW TAURUS PEDAL

Thank you for your trust and for selecting Taurus effects pedal.

Taurus is made by musicians for musicians. It's been our philosophy to provide you with the best possible quality, fully professional, superior musical equipment.

While designing this device we've taken in consideration that it requires more than just selecting the correct parameters, best components and hand crafting to achieve the perfect balance between technology and sound. Our very close collaboration with musicians has helped us to design and manufacture high quality equipment which will exceed your expectations and needs.

We at Taurus, extend our gratitude and wish you great musical experience, sonic adventures and explorations with our gear which will become your faithful companion!

Taurus Tux MK-2 effect controls dynamics of the instrument. It is built based on transparent and passive optical system. That means there are no side effects to the sound. Tux allows modification of dynamic by two main features: limiter or compressor. It is built based on transparent and passive for the quality of sound optical components. That means there are no side effects to the sound. There are two options of the sound, that can be chosen with CHARACTER switch:

SOLID – clean and pure, with no colouring. Very dynamic with characteristic PUNCH
TUBE- classic tube sound. This option allows compression and a little dirt of sound.

UNIQUE FEATURES:

Polarity Auto Detection – allows using supplies with center-positive and center-negative polarity

VOLTAGE RANGE 9-12V please note that analog effects supplied with 12V give 33% higher dynamics than with 9V.

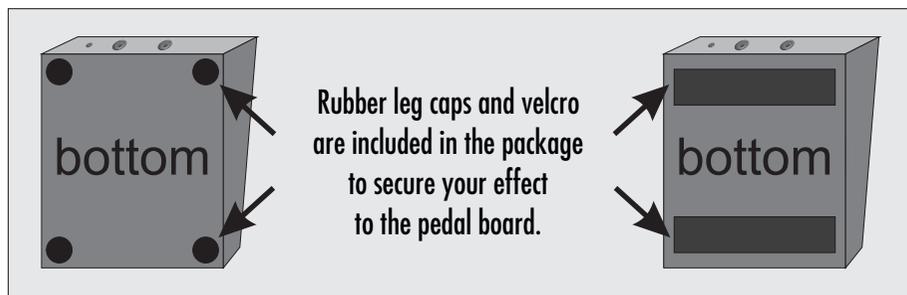

Internal Voltage Converter that adjusts to the voltage by increasing the supply from 9V to 18V or 12V to 24V. This feature expands the dynamics to another 100% in relation to analog devices supplied with 9-12V

DC Assistant - protects from loss of signal. Effect switches automatically to the "bypass mode" in case of disconnection or low voltage of DC supply (<6V).

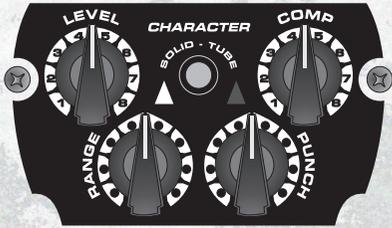

EFFECT SPECIFICATION

1. INPUT - mono 1/4" (jack) > impedance: 1M ohm
2. OUTPUT - mono 1/4" (jack) > impedance: 1K ohm
3. POWER SUPPLY INPUT - DC 9-12V /polarity supply auto detection/ connector dimensions 5,5x2,1mm.
Warning! Only stabilised power supply >100mA must be used
4. LEVEL - knob controls output volume level (at MIN position = the original signal level)
5. CHARACTER SWITCH - two mode available SOLID and TUBE
6. COMPRESS - compression level (ratio)
7. RANGE - knob controls range level (band-threshold)
8. PUNCH - attack level
Soft - fastest attack
Sharp - slowest attack
9. FOOT SWITCH - true-bypass when on the "Off" position
10. LED indicator - double colour LED indicator
green - Limiter "ON"
red - sound compression indicator.

Dimensions: (H x W x D) 65 x 96 x 144mm

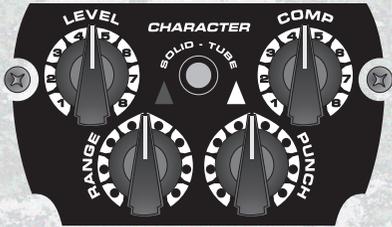

EXAMPLES OF SETTINGS

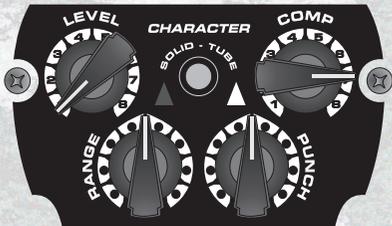

1

Experience compression
in the **SOLID** mode

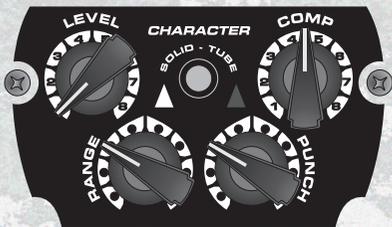

2

Experience compression
in the **TUBE** mode

3

Discover how
the **COMP** knob works.

4

Discover how the
RANGE&PUNCH
knob work.
